

In the Claims

This listing of claims replaces all prior versions, and listings, of the claims in the application.

Please amend the claims as follows:

1. (Currently Amended) A system for registering biometric information for use with a transponder-reader system, said system comprising:

a biometric sensor configured to detect a proffered biometric sample;

a device configured to associate said proffered biometric sample with user information and transponder information to create a data packet ~~to create a data packet~~, wherein said proffered biometric sample is associated with at least two accounts, wherein each of said at least two accounts includes at least one of: a charge card account, a credit card account, a debit card account, a savings account, a private label account, a PayPal account, a membership account, a Western Union account, an electronic bill payment account, an automatic bill payment account and a loyalty point account; and

a database configured to store said data packet, wherein said database is configured to communicate with said system.

2. (Original) The system of claim 1, wherein said device configured to associate said proffered biometric sample is configured to process, store, and verify said proffered biometric sample.

3. (Cancelled)

4. (Currently Amended) The system of claim 1, wherein ~~different~~ each proffered biometric ~~sample samples are~~ is associated with a different one of: personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information.

5. (Currently Amended) The system of claim 1, wherein said database configured to store said data packet ~~packets~~ is configured to store at least one of proffered biometric samples, registered biometric samples, user information, terrorist information, and criminal information.

6. (Currently Amended) The system of claim 1, wherein said database configured to store said data packet is contained in at least one of ~~the~~ said transponder, a transponder reader, a sensor, a remote server, a merchant server and said transponder-reader system.

7. (Currently Amended) The system of claim 1 6, wherein said database configured to store said data packet is contained in a remote database, and wherein said remote database is configured to be operated by an authorized sample receiver.

8. (Currently Amended) The system of claim 1, wherein said device configured to associate said proffered biometric sample is further configured to primarily associate ~~the~~ said proffered biometric sample with ~~at least one of~~ a first user information, wherein said first information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information, and wherein said device is configured to secondarily associate ~~the~~ said proffered biometric sample with ~~at least one of~~ a second user information, wherein said second information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information, where said second user information is different than said first user information.

9. (Currently Amended) The system of claim 1, wherein said device configured to associate said proffered biometric sample is further configured to associate a first proffered biometric sample with ~~at least one of~~ a first user information, wherein said first information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information, and wherein said device is configured to associate a second proffered biometric sample with ~~at least one of~~ a second user information, wherein said second information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account

information, electronic bill payment information, automatic bill payment information and loyalty point information.

10. (Currently Amended) The system of claim 1, wherein said device configured to associate said proffered biometric sample is further configured to associate a first proffered biometric sample with ~~at least one of a~~ a first user information, wherein said first information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information, and wherein said device is configured to associate a second proffered biometric sample with ~~at least one of a~~ a second user information, wherein said second information comprises personal information, credit card information, debit card information, savings account information, membership information, PayPal account information, Western Union Account information, electronic bill payment information, automatic bill payment information and loyalty point information, wherein said second user information is different than said first user information.

11. (Original) The system of claim 1, wherein said device configured to associate said proffered biometric is configured to associate a plurality of proffered biometric samples with user information, wherein each proffered biometric sample is associated with different user information.

12. (Currently Amended) The system of claim 2, wherein said device configured to associate said proffered biometric sample is further configured to process, store, and verify said proffered biometric sample, and wherein said device is configured to use ~~one or more a~~ a secondary security procedure ~~procedures~~ to facilitate verification of said proffered biometric sample, said secondary security procedure including sending a signal to said transponder-reader system to notify that an established rule for a transponder is being violated.

13. (New) The system of claim 1, wherein said biometric sensor configured to detect said proffered biometric is configured as at least one of a: a retinal scan sensor, an iris scan sensor, a fingerprint sensor, a hand print sensor, a hand geometry sensor, a voice print sensor, a vascular sensor, a facial sensor, an ear sensor, a signature sensor, a keystroke sensor, an olfactory sensor, an auditory emissions sensor, and a DNA sensor.

14. (New) The system of claim 1, wherein said at least two accounts are unassociated accounts.

15. (New) The system of claim 1, wherein said device configured to associate said proffered biometric is further configured to associate said data packet with a personal identification number to facilitate access to said data packet.

16. (New) The system of claim 1, wherein said device configured to associate said proffered biometric is further configured to associate a preset transaction limit with at least one of: said charge card account, said credit card account, said debit card account, said savings account, said private label account, said loyalty point account, said PayPal account, said membership account, said Western Union account, said electronic bill payment account, and said automatic bill payment account.

17. (New) The system of claim 1, further comprising a device to facilitate a selection of an account from said at least two accounts.
